- EBM Machining
- The company has been in business for over 22 years, with certified staff that also have established time in the field.
- Your success is our success, your partners in precision.
- With over 25 years of industry expertise, EBM Machining is a trusted name in precision CNC machining. Our journey began with a vision to deliver unparalleled machining solutions, and we've consistently exceeded expectations with our commitment to excellence. As a leader in the field, we take pride in our certified engineers, state-of-the-art machinery, and unwavering dedication to precision and detail.

Our team of certified engineers boasts an extensive track record in CNC machining. Their collective knowledge and experience form the backbone of our company's success. These experts understand that each project is unique and demands a tailored approach. Whether you require complex prototyping, high-volume production, or custom machining solutions, our team is ready to turn your ideas into reality.

At EBM, we're more than just a machining company – we're your partners in precision. We've invested in the latest Haas machinery to ensure your projects receive the highest level of precision and quality. Our top-of-the-line equipment, coupled with our skilled engineers, guarantees that we consistently meet and exceed your machining requirements.

But it's not just about machinery; it's about our unwavering commitment to precision and detail. Every project that passes through our facility is treated with the utmost care and attention to detail. We take pride in ensuring that each component, part, or assembly is meticulously crafted to meet your specifications. Our rigorous quality control process ensures that only the finest products leave our facility.

We understand that your success is our success, and we aim to cater to your unique needs. We work closely with each customer to understand your specific requirements and deliver solutions that align with your goals. Our commitment to customer satisfaction sets us apart from the competition, and we take pride in building long-lasting relationships with our clients.

At EBM Machining, our mission is simple: to deliver precision and excellence with every project. We're here to turn your ideas into reality, and we're ready to collaborate with you on your next CNC machining project.

Experience the difference of precision, quality, and dedication with EBM. Contact us today to discuss how we can be your machining partner of choice.

- 4 Departments 1.CNC Milling 2. CNC Lathe 3. Efficient Bandsaw Cutting Services 4. Quality Control

1. CNC Milling

CNC MILLING DEPT.

“EBM Machining has the capabilities to fulfill your CNC Milling needs. From prototyping to production runs, EBM Machining is your Premiere CNC Source”

At EBM Machining we follow a five-step sequence when producing a CNC part:

Interpret-Our certified programmers and machine operators interpret engineering drawings and follow the specifications

Generate -a process and program (logical process plan) with a CAD/CAM system and/or G and M-codes

Set up- the tooling, work holding device and work piece on the CNC milling centre

Manipulate- cutting conditions, based on the properties of the material and tooling used

Inspect the accuracy of dimensions within the specified tolerance ultimately maintaining your production running safe and efficiently.

2. CNC Lathe

“EBM Machining is your premium source for lathe machined parts. Our expertise and craftsmanship will satisfy your most rigorous needs and our lead times will fulfill any of your demands”

*At **EBM Machining** we follow a five step sequence when producing a CNC part:*

1. I**nterpret-**Our certified programmers and machine operators **interpret** engineering drawings and follow the specifications
2. **Generate** -a process and program (logical process plan) with a CAD/CAM system and/or G and M-codes
3. **Set up-** the tooling, work holding device and work piece on the CNC milling centre
4. **Manipulate-** cutting conditions, based on the properties of the material and tooling used
5. I**nspect** the accuracy of dimensions within the specified tolerance ultimately maintaining your production running safe and efficiently.

3. Efficient Bandsaw Cutting

Our high-quality bandsaw Allows us to cut up to 20-foot bars of flat, round, square, ribbed etc....material to approximate lengths to prep for machining. Materials including stainless steel, steel, plastic, aluminum among a few others.

4. Quality Control

Equipped with state-of-the-art tools, our certified staff works diligently to ensure your required specifications are met.

- Websites that I like:

- http://www.accessamerican.com (like this one 1st)
- http://www.protolabs.com/services/cnc-machining/
- http://www.xavier-parts.com (like this one 2nd)

  what I like about these websites is the features & standout colors, I like my website to be interactive and I like to have a live chat so that my customer or potential customer can hop on the site and immediately get in touch with myself and those others in charge. I like the tabs that are detailed with not so many words but enough to get the point across.

- Our products range from Automotive to our areas specialized in food grade and areas specialized in medical grade we also do aerospace among plenty others. Small jobs as well.

- Export we have done work for companies in Texas and neighboring states around Illinois among other parts of the U.S.

- Company Operating hours
  6 AM – 5 Pm Central Time Zone

EBM CAPACITIES PAGE

EBM MACHINING
859 S Westgate Ave
Addison IL, 60101
(773)590-1588

Current Capacity Form: As we continue to grow and update our machining and engineering repertoire.

CNC Equipment:

Mills:
(3) Haas VF – 4 SS
(1) Haas VF – 0
(1) Haas VF – 2 SS

Capacity up to 4000 lbs.
50" X- axis travel
20" Y- axis travel
25" Z- axis travel

Lathes:
(1) Haas SL-30
(1) Haas SL-20

Capacity up to:
Maximum Diameter: 8"
Maximum Length: 20"

Engineering:

(2) Cad/Cam workstations interfaced with licensed engineering/engineers and software including Mastercam 3D and Solid Works.

Efficient Saw Equipment:

(1) Amada automatic horizontal bandsaw

Capacity up to: Size: 20 Foot Long 9" High X 16" Wide & 10" Rounds/Flats/Square etc..

Shipping and receiving, Loading capacity:

(1) 3500 pounds capacity forklift
